Office Action Summary

Art Unit 1753

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-7, drawn to mixed resin, classified in Class 525, subclass 200+.

II. Claims 8 and 30-37, drawn to a drum or pipe, classified in Class 428, subclass 34.1.

III. Claims 9-17, drawn to process for the production of a pipe, classified in Class 425, subclass 4+.

IV. Claims 18-29 and 38-56, drawn to photosensitive drum, classified in Class 430, subclass 39.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II, IV and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as lamination and the material of Group I can be used in a materially different product such as a laminate.

Art Unit 1753

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
